

Stamps: Certified Copy

Owning an agency myself for years, I have built my successes on having easy to implement systems so that no matter which one of my staff, self included, touches a file the systems will be consistent and complete.

Here is a stamp we had made that goes on any document that requires to be certified as a true original.

**I hereby attest that this
document is a certified
true copy of the original**

Just print this off and send to your stamp maker! Its that easy.
